Project Safety Rules

HOLCOMB DEVELOPMENT COMPANY is committed to safety and health on all projects. Employees may review their rights by reading the MIOSHA documents posted on this project. All employees and subcontractor employees shall be made aware of the following project safety rules:

1. A copy of the subcontractor's written safety program will be kept on the jobsite.
2. All subcontractors, before beginning work on this jobsite, will give their employees a safety orientation and explain the project safety rules.
3. This project is 100% hard hat jobsite.
4. Any accident, injury or an unsafe condition must be reported to your supervisor immediately. All subcontractors on this project are required to maintain M.S.D.S. on the jobsite and to train its employees in the identification and safe handling of hazardous chemicals. Subcontractor is responsible to inform other employer of any precautionary measures that need to be taken to protect employees. M.S.D.S. will be kept on the jobsite by _____ (name of subcontractor's superintendent).
5. Eye, face, and ear protection must be used when cutting, grinding, chipping, burning, welding, air cleaning or using power actuated tools. Personal protective equipment shall be maintained and kept clean.
6. Proper work clothes and work boots are required, no shorts, cutoffs, street shoes, or gym shoes.
7. The use or conveyances of alcohol or illegal drugs will be grounds for immediate removal from this project.
8. Pranks, horseplay, or any action endangering others is not allowed.
9. Mobile scaffolds on casters with work platforms four (4) feet or higher will use a guardrail system.
10. Safety belts/harnesses, lanyards, rope grabs, and lifelines will be used above six (6) feet if no other means of fall protection would be effective (OSHA, Subpart M).
11. Compress gas cylinders must be tied off in an upright position.
12. All ladders and scaffolds must be properly erected and used. Any broken/defective ladder or scaffold must be taken out of service and off the project.
13. Housekeeping - all work areas, walkways and stairs must be kept clear of debris and loosely scattered materials.
14. All tools and equipment must be kept in good working order, with guards and safety devices in place and working. Defective tools must be taken out of service.
15. Only authorized personnel may operate equipment. No riding on material handling equipment is permitted.
16. All gasoline brought onto the project will be contained in approved safety cans. Machines being refueled will be shut off. There will be no smoking or open flames around flammable liquids.
17. Safety devices and guard systems must be replaced if removed for a work operation. This includes barricades, guardrails, covers, and warning tape.
18. Any area where burning or welding is being done must be cleared of combustibles and a fire extinguisher provided.
19. All electrical tools, equipment, and cords must be checked regularly and items found defective taken out of service until repaired.
20. Weekly safety meetings will be held by all subcontractors on this project and minutes turned into HOLCOMB DEVELOPMENT COMPANY.
21. Subcontractor employees must comply with all safety and health rules issued by MIOSHA, Michigan Department of Public Health, the Project Owner, and HOLCOMB DEVELOPMENT COMPANY
22. Ground fault interrupters (GFI) will be used for electrical power tools used outside and in any wet or damp area including when an extension cord is connected to permanent power without GFI protection.

I have read the above Safety Rules and agree that my employees and/or subcontractors who work on any HOLCOMB DEVELOPMENT CO. projects will comply with these requirements.
